IDENTIFIERS	*Educational Indicators; *Oklahoma; Reform Efforts

ABSTRACT

This annual report presents information on the Oklahoma Educational Indicators Program, a system developed in accord with the Oklahoma Education Reform Act of 1990 to assess public schools and school districts. This report provides data in tabular form related to test results and other outcomes, as well as student and teacher information, for each public school site. District and state reports, separately published, present information at those levels. The Oklahoma student enrollment of 594,338 in 1993 represents a 3.7% increase over 1990. These students are served by 39,920 full-time equivalent staff. There has been an increase in test scores over 1990 in all grades taking the Iowa Tests of Basic Skills and the Tests of Achievement and Proficiency. While scores on the American College Test were slightly below national averages, scores on the Scholastic Aptitude Test were well above the national average and higher than those of 1990. The 1993 report reflects the new cost accounting system in Oklahoma. Ten tables present school indicators. Six appendixes provide supplemental information. (SLD)

Sandy Garrett, Secretary of Education

This document is a summary report of the site-based results of Oklahoma Public Schools for the year beginning in the fall of 1992 and ending in the spring of 1993. This is the third year for issuing a report from the Oklahoma Educational Indicators Program which summarizes results at the school site level.

This publication was prepared by the Office of Accountability, was printed by the State Department of Education Printing Services, as authorized by Sandy Garrett, State Secretary of Education. Seven hundred copies have been prepared at a cost of $4,069.80. Copies have been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries. February, 1994.

February 1, 1994

TO THE CITIZENS OF OKLAHOMA:

We are pleased at this time to present *Results 1993,* the annual report prepared by the Office of Accountability on the Oklahoma Educational Indicators Program. The Indicators Program is a system developed in accordance with the Oklahoma Education Reform Act of 1990 for the purpose of assessing the performance of public schools and school districts.

Results 1993 is being issued to inform the public of the progress which has been made in achieving the goals of quality education. As Oklahoma continues its implementation of educational reforms, we encourage educators, parents, community members, and other interested persons and groups to use the information contained in these reports to effect continued improvement for all children in the state.

Results 1993 includes data for the 1992-93 school year for all categories of measurement. Applicable indicators have been compiled separately for each school site, each school district, and the entire state. Information reported for these entities is contained in three separate reports, as described in the following paragraph.

The School Report provides data in tabular form related to test results and other outcomes, as well as student and teacher information, for each public school site. The District Report is a graphic presentation of student and teacher information, revenue and expenditure data, test results, and other student outcomes for each public school district. The State Report contains a graphic display of state-level results for each major indicator for the most recent four-year period, plus a summary showing the progress made thus far in complying with the provisions of Oklahoma's 1990 Education Reform Act.

Results 1993 is truly a "report card" for Oklahoma's schools, in that it provides information to the public for its assessment of student learning in a wide range of categories. It also provides information about teachers and the resources available to meet Oklahoma's educational goals. Above all, the Indicators Program is concerned with results. It is designed to serve as an accurate system of educational measurement, without placing undue reliance upon any single type of indicator.

Sincerely,

Sandy Garrett

Sandy Garrett
Secretary of Education

SCHOOL REPORT

I. EXECUTIVE SUMMARY

Results 1993 is the "report card" prepared by the Oklahoma Office of Accountability to reflect progress on various measurements of educational performance, as provided in the Oklahoma Educational Indicators Program. Statistical information on a wide array of educational indicators is presented by school site, school district, and the entire state. For the major indicators, changes in state results for the most recent four-year period, where available, are highlighted in the following paragraphs.

Oklahoma's student enrollment in public schools has increased from 573,323 in 1990 to 594,338 in 1993, based upon average daily membership (ADM). This reflects an increase of 3.7% during this period. There has also been a change in the ethnic makeup of our student population since 1990. The number of students in each ethnic category stated as a percentage of the total student population is shown as follows for 1990 and 1993:

	1990	1993	Change
Native American	11.4%	13.0%	1.6%
Hispanic	2.6%	3.1%	0.5%
Black	9.9%	10.2%	0.3%
Asian	1.1%	1.2%	0.1%
White	75.0%	72.5%	-2.5%

In regard to classroom teachers, the number of Full-Time Equivalent (FTE) staff increased from 35,559 in 1990 to 38,290 in 1993, a growth rate of 7.7%. During this same time period, the average teacher salary went from $24,659 to $28,170, an increase of 14.2%. The percent of teachers with advance degrees decreased from 41.1% in 1990 to 38.7% in 1993, while the average number of years as a teacher was 11.7 in 1993, the same as it was in 1990.

For student achievement, there was an increase in test scores at the state level in 1993 over 1990 in all grades taking the current Iowa Tests of Basic Skills and Tests of Achievement and Proficiency (ITBS/TAP), which were introduced in 1990. The composite percentiles are shown as follows for each grade:

	3rd	5th	7th	9th	11th
1990	55	58	57	59	53
1993	62	64	60	61	59

Results 1993

SCHOOL REPORT

I. EXECUTIVE SUMMARY
(Continued)

The average composite score for the American College Test (ACT) was 20.2, compared to 20.0 in 1990, the first year the current test was introduced. The national average for 1990 and 1993 was 20.6 and 20.7, respectively. However, on the Scholastic Achievement Test (SAT), the verbal and math scores in 1993 (482 and 530, respectively) were well above the national average and were both higher than in 1990 (478 and 523, respectively).

All districts in the state converted to the new Oklahoma Cost Accounting System (OCAS) during the 1991-92 school year. Accordingly, this year's Indicators Reports are the first to contain financial results based upon OCAS procedures. These procedures not only ensure uniform reporting from all districts, but also provide much greater accounting detail. Whereas the revenues and expenditures contained in this report involve the General Fund only, it is possible under OCAS to obtain details for other funds as well. Accordingly, we plan to expand the reporting to include revenues and expenditures from other funds in future reports.

More than $2.1 billion in total revenues was funded for common education in 1993, an increase of 23.5% over the $1.7 billion funded in 1990. Of the 1993 total, nearly $1.5 billion (approximately 70%) was in state appropriated funds. This was an increase of about 37% over the $1.1 billion in state revenues appropriated in 1990. Local and federal revenues in 1993 were $492 million and $149 million, respectively, compared to $519 million and $123 million, respectively in 1990.

There was a total of more than $2.1 billion in expenditures on common education in 1993, which was an increase of 23.5% over the $1.7 billion spent in 1990. Of the 1993 total, more than $1.3 billion (62%) was spent on instruction. This was an increase of 21% over the $1.1 billion spent for instruction in 1990.

Other student information is shown as follows for 1990 and 1993:

	1990	1993	Change from 1990 to 1993
Dropout Rate	3.6%	3.2%	-0.4%
% Eligible for Free or Reduced-Payment Lunch	36.0%	39.1%	3.1%
% Identified for Special Education	11.3%	11.8%	0.5%
Graduation Rate	78.0%	77.1%	-0.9%

Results 1993

SCHOOL REPORT

II. INTRODUCTION

The Oklahoma Educational Indicators Program was established in May, 1989, by Senate Bill 183. All provisions of the program were later included in House Bill 1017, commonly referred to as the Oklahoma Education Reform Act, which was approved by the Governor in April, 1990. As a result of an initiative petition, this act was also approved in a vote by Oklahoma's general populace in October, 1991. The Indicators Program is a system developed for the dual purpose of: (1) assessing the performance of public schools and school districts, and (2) reporting to students, parents, and the general public the progress being made in meeting the provisions of the Education Reform Act. It is intended that there be no undue reliance placed upon any single type of indicator.

The statutes provide that a summary report be prepared each year to inform the people of Oklahoma of the latest results for all categories of measurement included in the Indicators Program. In accordance with this provision, the indicators authorized by the Reform Act have been compiled for the 1992-93 school year separately for each school site, each school district, and the entire state, to the extent that the applicable data is available for each of these entities. The reports prepared for each entity are contained in a separate volume, under the master title of *Results 1993*. The contents of the reports are explained briefly as follows:

1. School Report. This volume contains achievement and writing test scores in tabular form by grade level and subject for each individual school site for the 1992-93 school year. State averages are included for each category so that comparisons may be readily made. Also included in this volume are student enrollment figures, free-lunch eligibility data, and teacher information. In addition, there are appendices showing data for early childhood enrollment, student dropouts, ACT scores, Oklahoma college-going rates, and grade point averages (GPAs) for Oklahoma college freshmen who graduated from high school in 1992.

2. District Report. This volume contains a separate page for each district showing indicators in graphic form for the 1992-93 school year. Major categories included are teacher characteristics, student outcomes, student achievement, student characteristics, revenue sources, areas of expenditures, and revenue and expenditure on a per pupil basis. School districts have been placed in groups based upon factors found to be important to student performance so that reasonable comparisons may be made.

3. State Report. This volume contains graphs of state-level results for the 1992-93 and preceding school years, where available, for the major categories of measurement. Also included in this volume is a summary of provisions of the Education Reform Act showing the progress made thus far in complying with the various provisions.

The information contained in *Results 1993* has been compiled for the purpose of informing the public of the progress which has been made during the year towards achieving the state goal of top quality education, as Oklahoma moves forward with its comprehensive education reform program.

SCHOOL REPORT

III. NATIONAL EDUCATION GOALS

During the Education Summit convened by the President with the nation's governors in 1989, six fundamental goals were established for American schools, each of which is to be accomplished by the year 2000. These goals, initially embraced by Governor Walters, have since been formally adopted by the Oklahoma State Board of Education. The State Department of Education, along with all educators throughout the state, are committed to achieving these goals by the year 2000. The goals are listed as follows:

1. All children in America will start school ready to learn.
2. The high school graduation rate will increase to at least 90 percent.
3. American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter, including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy.
4. U. S. students will be first in the world in science and mathematics achievement.
5. Every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.
6. Every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning.

IV. BACKGROUND & CONTENT

1. Background

As discussed in Section II of this report, the Oklahoma Educational Indicators Program was initially established by Senate Bill 183 in 1989, and later included as part of the Oklahoma Education Reform Act of 1990 through House Bill 1017. The Indicators Program provided that a system be developed for public disclosure of school performance data, wherein educational outcomes are to be reported which reflect results in several categories in the context of pertinent background information. Following is some of the indicative legislative language: "... the performance of public schools and school districts is assessed and reported without undue reliance upon any single type of indicator, ..." and "... in the contexts of socio-economic status and the finances of school districts."

The comprehensive educational reform legislation has sent a definite signal to the citizens of Oklahoma as to how vital education is to the current and future well-being of the state and the priority it holds as we near the 21st century. Among the many facets of education addressed in this legislation is the focus on educational outcomes as a means of assessing progress and success in our schools. Educational performance of students becomes a major component in determining school effectiveness. Measuring outcomes is an important vehicle through which strengths and weaknesses are identified. This allows educators to set goals and objectives based on established results and to direct more energies toward known areas of deficiency.

Upon establishment of the Indicators Program, a district indicators report was issued in November, 1989. This report, entitled "Perspectives," was prepared by personnel at the Oklahoma State Department of Education for the 1988-89 school year. In 1990, as mandated by House Bill 1017, the Office of Accountability (O of A) was established under the direction of the Oklahoma Secretary of Education and the Oklahoma Education Oversight Board. The O of A then assumed responsibility for the Oklahoma Educational Indicators Program, and has since prepared district indicators reports each year from the 1989-90 school year forward. A site-level report has also been prepared each year since the 1990-91 school year. Both the site-level reports and district-level reports for the 1992-93 school year are being issued concurrently as parts of *Results 1993*. This is in compliance with House Bill 1017 which states that "... information shall be provided individually for all public schools and school districts."

2. Contents of School Report

Traditionally, indicators reports contain measures related to *outcomes* and *context*. Outcomes are those indicators that measure student learning, performance, and behavior. Context indicators provide background information on the characteristics of the school populations reported. Context measures such as student ethnicity and socio-economic levels are typically fixed and therefore cannot be controlled or adjusted by school policy or decision making. Other context measures such as teacher salary or advanced degree attainment can be influenced by school or district actions. The following narrative identifies the particular outcomes and context indicators contained in this report.

IV. BACKGROUND & CONTENT
(Continued)

2. Contents of School Report (Continued)

A. Outcomes. The majority of the outcomes contained in this report are test scores from the Oklahoma School Testing Program (OSTP). The OSTP administers nationally norm-referenced tests in the areas of achievement and writing. These test results are provided for each public school in Oklahoma along with state averages for each test. The report format used enables schools to make ready comparisons with each other and with overall state results.

The achievement test used was the Iowa Tests of Basic Skills/Tests of Achievement and Proficiency (ITBS/TAP). It was given to students in grades 3, 5, 7, 9, and 11 (Tables 1-5). These tests measure achievement in a variety of subject areas and provide an overall composite score as well. The writing assessment, given to students in grades 7 and 10, was adopted from the Stanford Writing Assessment Program (Tables 6-7). On this test, students were asked to write in response to a verbal prompt. The writing was scored holistically by two professionally-trained raters, and the two holistic scores were averaged to obtain a raw score, which was then converted to a percentile rank.

In addition to test results, other outcomes in this report are dropout figures, ACT scores, Oklahoma college-going rates, and 1992-93 college freshmen Grade-Point Averages (GPA) of prior year graduating seniors from each public high school in the state. There are two dropout reports--one showing dropouts by race for all public high schools and one showing dropouts by month (Appendix B and C). The ACT report (Appendix D) contains the average composite 1992-93 test score for each high school. The college-going rate report (Appendix E) contains the number and percentage of 1991-92 high school graduates by school who attended an Oklahoma college or university in 1992-93. The only Oklahoma public or private post-secondary institution not included is Phillips University. The college freshmen performance (GPA) report (Appendix F) shows composite GPA scores for 1991-92 graduating high school seniors who were college freshmen in 1992-93, separately by high school. The GPA scores are provided only for those college freshmen who attended an Oklahoma public institution of higher education in 1992.

B. Context. The context information provided in this report is related to the student and teacher populations for each public school in the state. The total student enrollment and the enrollment by race are contained in this report (Table 8). The enrollment data is based on reports submitted to the Department of Education from each school showing a "snapshot" of students enrolled as of October 1, 1992. In addition to racial breakdowns, the number of students identified as Limited English Proficient (LEP) is also provided. The percentage of students eligible for free lunch (Table 9) provides an estimate of the overall socio-economic level of the student body for each school site. This information is reported on the application form submitted by districts seeking to implement a Chapter I program. Most districts submit for program assistance. Early Childhood enrollment, based on those students who participated in programs designed for pre-kindergarten and younger age groups, is contained in Appendix A of this report.

Teacher information is provided for all schools (Table 10). The report contains information for each school regarding the total number of teachers, based upon Full-Time Equivalency (FTE), the percent with an advanced degree (masters and above), the average years of experience, and the average salary with fringe.

APPENDIX A

EARLY CHILDHOOD ENROLLMENT BY SCHOOL

Since July 1980, the state has provided funds for public school programs for four-year-old children. In those schools which have early childhood programs, children attend school four half days per week with the fifth day designated for parent involvement and collaboration. Classrooms are arranged with a 1-10 adult-child ratio. In each school, an attempt is made to provide continuity between the four-year-old and kindergarten programs.

Programs provide a developmentally appropriate curriculum that emcompasses the physical, intellectual, social and emotional development of each child. Problem-solving, creativity, self-discipline and independence are encouraged.

APPENDIX D

MEAN ACT COMPOSITE SCORE BY OKLAHOMA HIGH SCHOOL SITE

The State Regents for Higher Education has submitted this report in cooperation with the State Department of Education and in accordance with legislation related to the Oklahoma Educational Indicators Program.

The 1993 ACT results provide Oklahoma the first opportunity to consider only test takers who took the enhanced ACT exam. With the assistance of the State Department of Education, counties, districts, and high schools were listed, followed by a high school code assigned by ACT, a computed mean composite score of high school graduates and the number of graduates who took the exam. For high schools with five or fewer test takers, an asterisk was entered in the mean ACT column in order to comply with the federal privacy act. A few high schools have blank entries which indicate that there were no ACT test takers reported that year.

APPENDIX E

OKLAHOMA COLLEGE-GOING RATES OF OKLAHOMA HIGH SCHOOL GRADUATES

1991-92 High School Graduates

1992-93 College-Going Rate

As part of the cooperative effort between the State Regents for Higher Education and the State Department of Education concerning the Oklahoma Educational Indicators Program, the State Regents has produced the High School to College-Going Rates of Oklahoma High School Graduates Report.

The report provides the number and percentage of high school graduates for the 1991-92 school year that entered an Oklahoma college or university in 1992-93. Not included in the report are students who were accepted at an institution but did not enroll, students who enrolled in an institution but did not attend classes, or students who withdrew from the institution within the two week period at the beginning of the semester.

HIGH SCHOOL TO COLLEGE PERFORMANCE REPORT

1991-92 Oklahoma High School Graduates
1992-93 Oklahoma College Freshmen

The following report contains the composite Grade-Point Averages (GPA) by headcount and semester hours of 1992-93 college freshmen attending public institutions of higher education in Oklahoma who were graduates of Oklahoma high schools in 1991-92. The report identifies the high schools from which the 1992-93 college freshmen graduated and the performance of those graduates during their freshman year in college.

The GPA is divided into four ranges: 0.0 - 1.6, 1.7 - 1.9, 2.0 - 2.9, and 3.0 and above. The lowest GPA range (0.0 - 1.6) is consistent with the level of performance that results in probation of a college student following the first occurrence and suspension after the second occurrence. This provides information back to the high school of the number and percent of their 1991-92 graduates who proceeded to enroll in college but failed to perform at the minimum level to sustain college enrollment. Not included in the report are students who were accepted at an institution but did not enroll, students who enrolled in an institution but did not attend classes, or students who withdrew from the institution within the two week period at the beginning of the semester.

The report was completed by the State Regents for Higher Education in cooperation with State Department of Education in the production of the Oklahoma Educational Indicators Program reports.
